JAPANESE RED-LEAF BARBERRY

Similar to the green-leaved Japanese Barberry, but the foliage is a rich, bronzy red, similar to the red-leaved Japanese Maples. As the season advances, this new variety becomes more brilliant and gorgeous and in the fall its foliage changes to vivid orange scarlet and red shades. All that is required to develop its brilliant coloring at all seasons is that it be planted in full exposure to the sun.

	Each
15-18" high	\$1.00
18-24" high	1.75
2-3' high	2.50

Velvet King, glossy dark purplish violet.....	1.50	10.00	90.00
Violet Queen, deep violet with blue base....	1.25	9.00	80.00
CHOICE MIXED80	6.00	50.00

No less than a dozen of any one variety.

50 of a variety at the 100 rate; 500 at the 1000
rate, Postpaid.

Directions—Plant TULIP BULBS in October or early November, from 8 to 12 inches apart, and set them 4 inches under the ground, or, in other words, 4 inches of soil should cover the bulbs. They should be planted where the drainage is good. While they enjoy a sandy loam soil, they will do well in heavy soil if planted where melting snow will immediately drain away. When the ground is frozen solid, cover with 2 or 3 inches of straw or litter, which should be removed early in April.

HYACINTHS

Large Bedding

Alida Cornelia, light rose.

Grand Monarque, porcelain blue.

Grand Maitre, lavender blue, shaded darker.
